Appendix A: Frequently asked questions 6

Q1. Can I enrol a customer whose phone is registered in their spouse's name? 6

Q2. What is the daily SIM banking limit? 6

1. Purpose

This circular sets out how branch staff enrol customers for SIM banking, so that only the account holder can operate the account from their phone.

2. Scope

This circular applies to individual customers with active savings or current accounts.

3. Definitions

- **SIM banking:** banking services on a mobile phone through the bank's USSD menu.
- **SIM banking PIN:** the secret number the customer uses to confirm SIM banking transactions.
- **SIM registration:** the record held by the mobile network showing whose name a SIM card is registered in.
- **Form SB-01:** the SIM banking enrolment form.

4. Roles and responsibilities

- **Customer service officer:** verifies the customer and phone ownership and completes the enrolment.
- **Supervisor:** authorises the enrolment.
- **Digital Banking:** supports the service and handles blocks reported through the contact centre.

5. Procedure

5.1 Verify the customer's identity [MANDATORY CONTROL]

Check the customer's original identity document against the account record.

5.2 Confirm phone ownership [MANDATORY CONTROL]

Confirm that the SIM card is registered in the customer's own name, using the network's SIM registration check. Do not enrol a phone number registered to another person.

5.3 Enrolment form

The customer completes and signs Form SB-01 with the account number and phone number.

5.4 Link the account and set limits

Link the account to the phone number on the SIM banking system. The default daily limit is TZS 2,000,000. Higher limits need the branch manager's approval.

5.5 The customer sets the PIN privately [MANDATORY CONTROL]

The customer sets the SIM banking PIN on their own phone. Staff must never ask for, see or write down a customer's PIN.

5.6 Test transaction

Ask the customer to make a balance enquiry to confirm the service works.

5.7 Supervisor authorisation

The supervisor checks Form SB-01 and authorises the enrolment.

6. Exceptions and escalation

- **Lost or stolen phone:** the customer reports it at a branch or through the contact centre; SIM banking is blocked immediately.
- **Forgotten PIN:** the customer visits a branch with an original identity document for a PIN reset.

7. Records and retention

SIM banking enrolment forms: for the life of the service plus 7 years. Records are kept in the branch file room or the document management system and destroyed only under the bank's records retention schedule. Records that are part of an open complaint, dispute, audit or investigation are kept until it is closed.

8. Monitoring and quality assurance

Back office quality assurance reviews a sample of files every month against this circular and reports exceptions to the branch manager and to Digital Banking. Repeated exceptions at a branch are reported to the Head of Branch Operations. Internal audit may review compliance with this circular at any time.

Appendix A: Frequently asked questions

Q1. Can I enrol a customer whose phone is registered in their spouse's name?

No. The SIM card must be registered in the customer's own name.

Q2. What is the daily SIM banking limit?

TZS 2,000,000 by default. Higher limits need the branch manager's approval.
