Appendix A: Frequently asked questions 6

Q1. Can I reset a customer's password if they call and answer security questions? 6

Q2. How long is the temporary password valid? 6

1. Purpose

This circular sets out how branch staff enrol customers for internet banking and reset internet banking passwords safely.

2. Scope

This circular covers individual and business customers.

3. Definitions

- **Internet banking:** banking services through the bank's website.
- **Temporary password:** a one-time password sent by SMS to the registered phone number.
- **Maker and checker roles:** for business customers, one user captures payments and another approves them.

4. Roles and responsibilities

- **Customer service officer:** verifies the customer and completes enrolment or reset.
- **Supervisor:** authorises enrolments and resets.
- **Digital Banking:** manages the internet banking platform.

5. Procedure

5.1 Verify the customer's identity [MANDATORY CONTROL]

Check the original identity document of the customer, or of every business user, against the account record.

5.2 Enrolment form

The customer completes Form IB-01. Business customers attach a board resolution or partners' letter naming each user and their maker or checker role.

5.3 Set up users and roles

Create the user profiles. For business customers, no single user may both capture and approve payments.

5.4 Temporary password

The system sends a temporary password by SMS to the registered phone number. It expires after 24 hours and must be changed at first login.

5.5 Password reset in person only [MANDATORY CONTROL]

Password resets are done only in person at a branch with an original identity document. Never reset a password on a request by phone, email or social media.

5.6 Supervisor authorisation

The supervisor checks the form and authorises the enrolment or reset.

6. Exceptions and escalation

- **Registered phone number out of date:** update it first under CIR-ACC-15.
- **Suspected account takeover:** block internet banking and inform Fraud Risk the same day.

7. Records and retention

Enrolment and reset forms: for the life of the service plus 7 years. Records are kept in the branch file room or the document management system and destroyed only under the bank's records retention schedule. Records that are part of an open complaint, dispute, audit or investigation are kept until it is closed.

8. Monitoring and quality assurance

Back office quality assurance reviews a sample of files every month against this circular and reports exceptions to the branch manager and to Digital Banking. Repeated exceptions at a branch are reported to the Head of Branch Operations. Internal audit may review compliance with this circular at any time.
